

REMARKS

The Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, dated June 4, 2001, has indicated that the location and meaning the amino acid "Xaa" in SEQ. ID. NOS.: 3 and 4 must be explained, and that the Sequence Listing has wrapped nucleics due to improper margins.

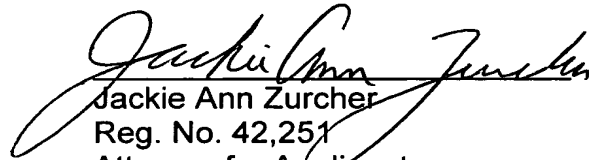

The amended Sequence Listing set forth on the substitute sheets enclosed herewith has corrected margins and explains the location and meaning of "Xaa" in SEQ. ID. NOS.: 3 and 4. More specifically, SEQ. ID. NOS.: 3 and 4 contain "Xaa" at positions 135 and 139, and "Xaa" indicates the amino acid is "unknown or other".

A disk containing a computer readable form of the amended Sequence Listing is enclosed herewith. The information recorded in computer readable form is identical to the amended Sequence Listing set forth on the substitute paper copy. No new matter has been added. The attached diskette is submitted in American Standard Code for Information Interchange (ASCII) text.

A copy of the Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures is enclosed herewith.

Respectfully submitted,

MARCO BUSCH
